News

DETB "Sovelmash"

New equipment has arrived at the DETB — a test bench for drives and propellers, a laser tube cutting machine, and an automatic stamping press for series production

January

A seven-operation die for manufacturing the electromagnetic system of an angle grinder and tooling for casting aluminum parts have been delivered

February

**Historic moment — the
commissioning of the
crucible furnace!**

March

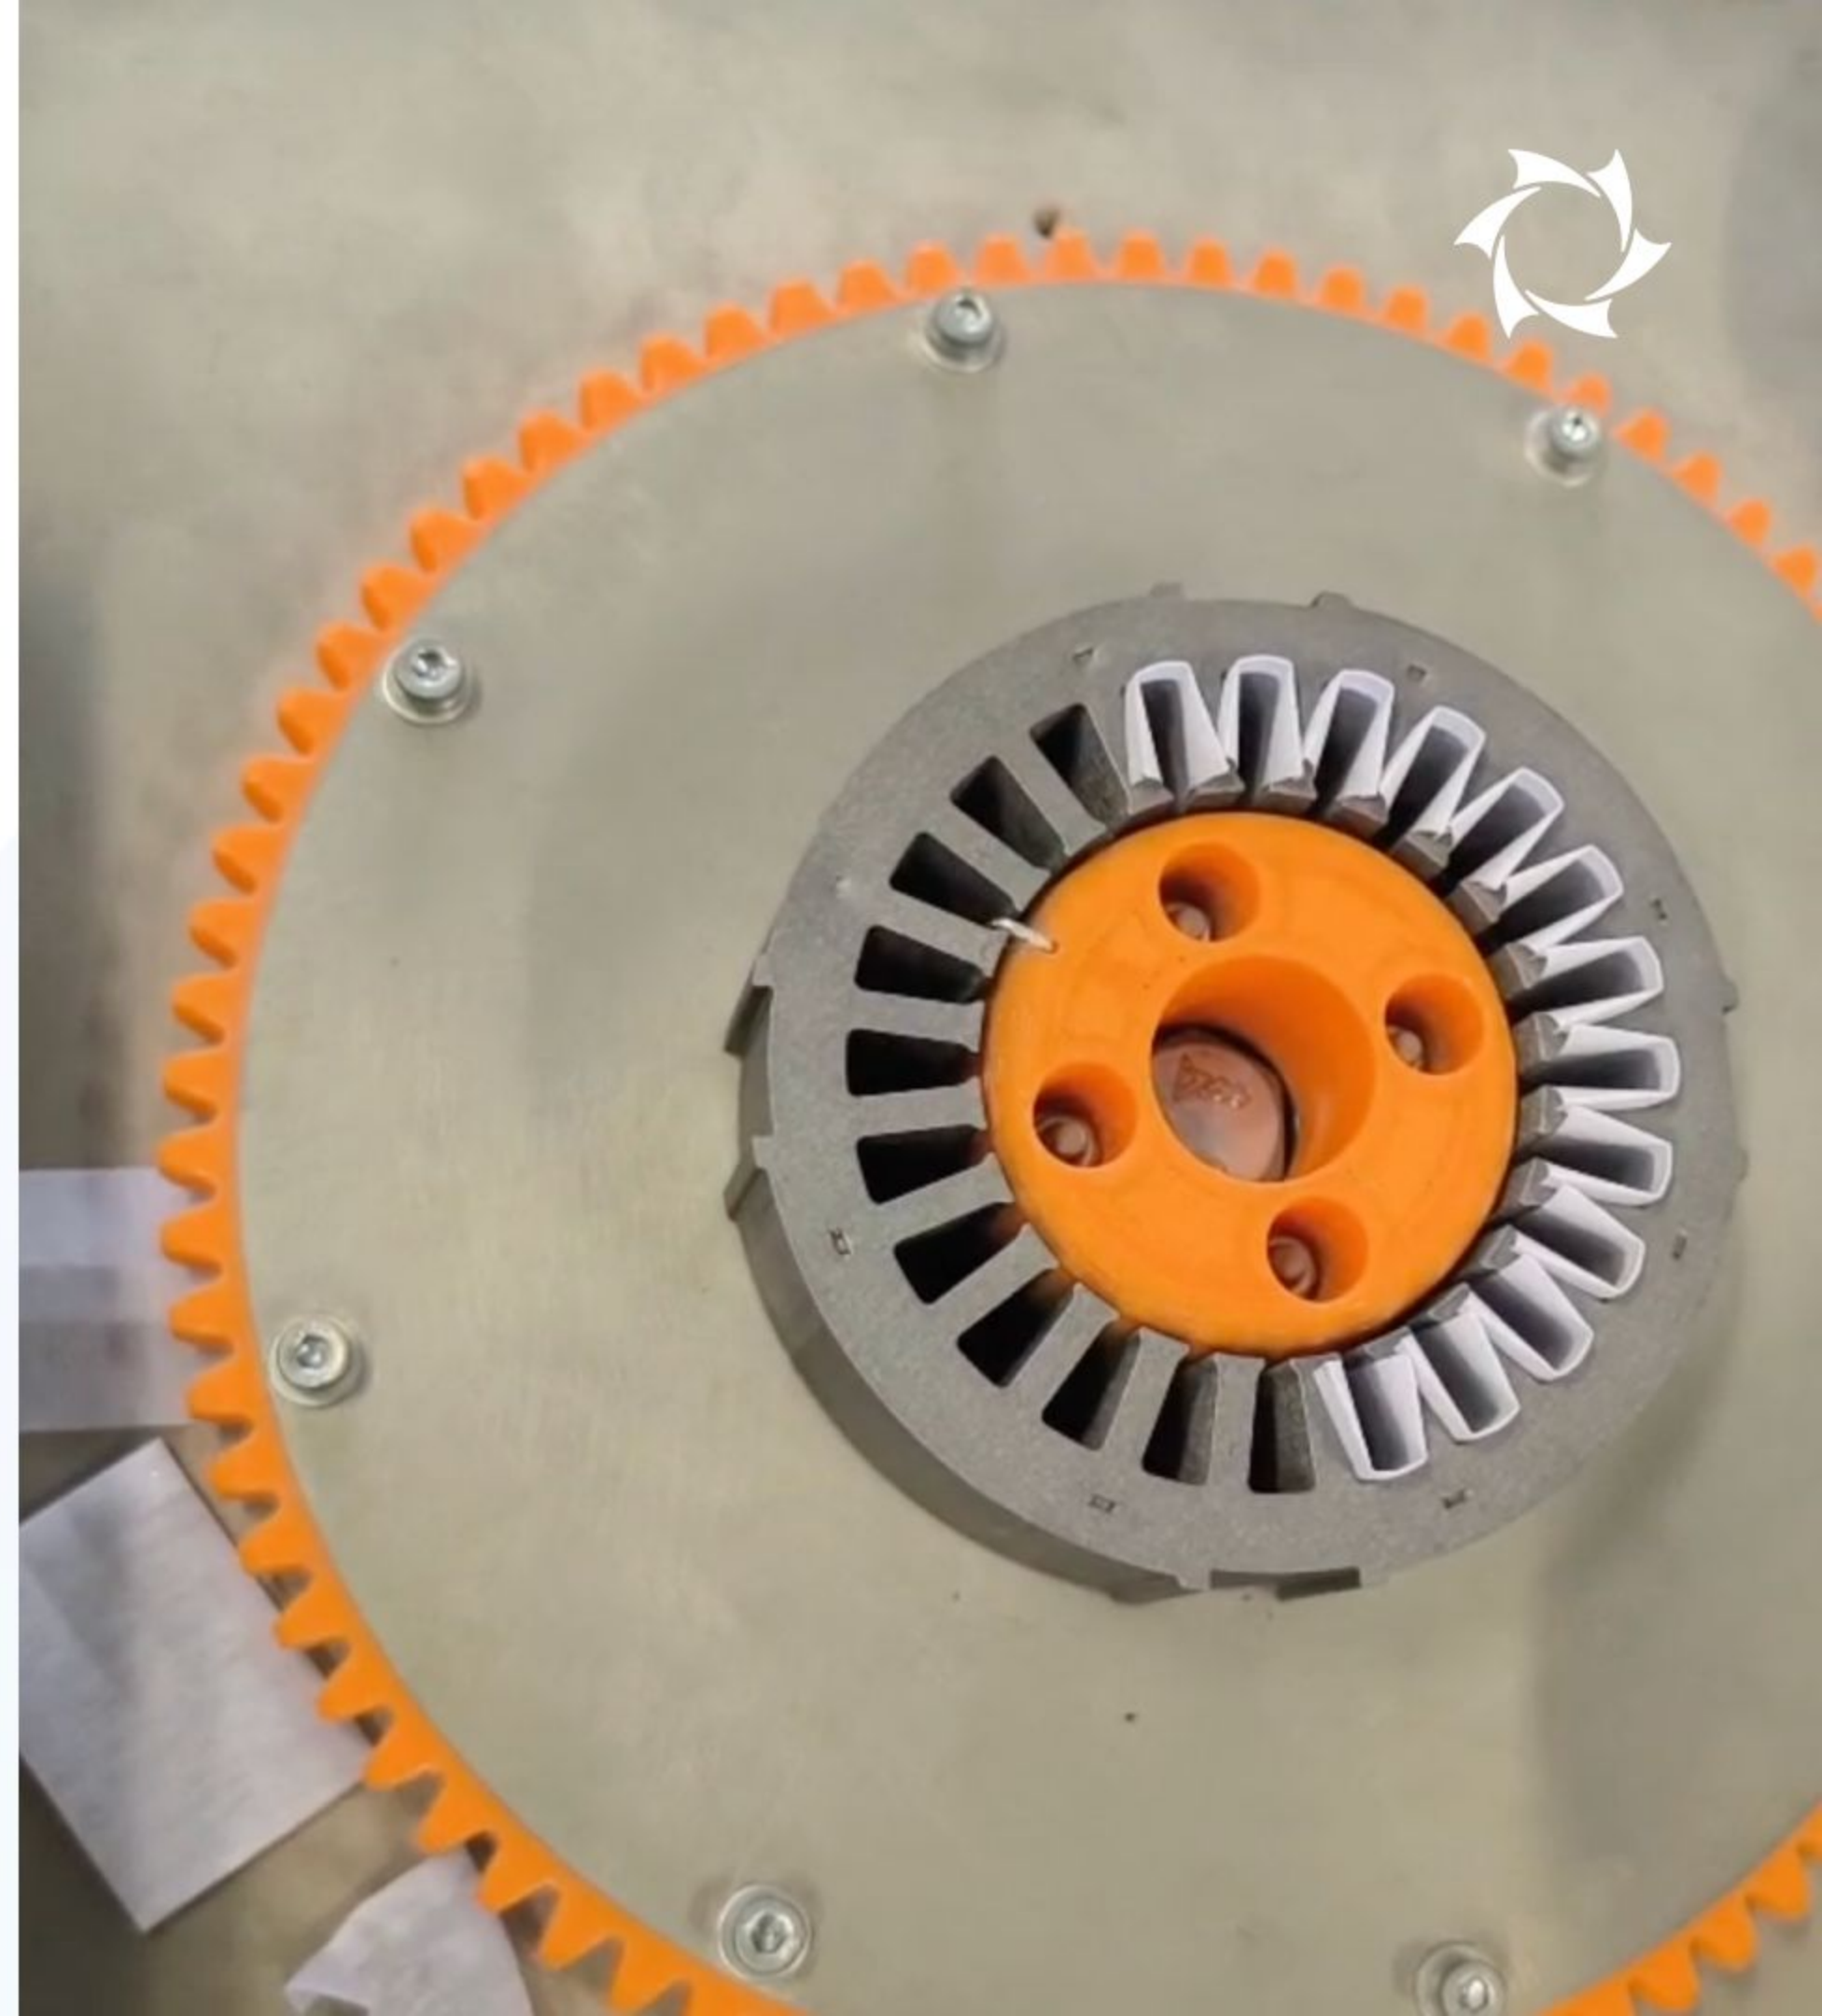

As part of the commissioning of the stamping die, the first mass-production item was manufactured: **stator of an integrated drive** for a handheld power tool

April

A slotting machine has been commissioned for manufacturing the stator of an angle grinder

May

Drone of the superheavy class "Motylek" with asynchronous electric motors, developed at "Sovelmash", was tested for the first time in the open air

May

**A manufacturing process
has been launched, which
will enable series
production of stator and
rotor cores**

June

A cold heading machine has been delivered. It will be used to produce shafts and axles for motors at a rate of 6 units per second

June

Received **rotors** of frame size 318 with a 55 mm stack.

Prepared **frames** for the frame size 318 motor to accommodate a 50 mm stack

June

The chiller plant has been commissioned — it is the most complex engineering equipment system at the DETB

July

New equipment has arrived:

- chip briquetting unit,
- vacuum impregnation unit,
- two section winding machines,
- coil insertion machine

July

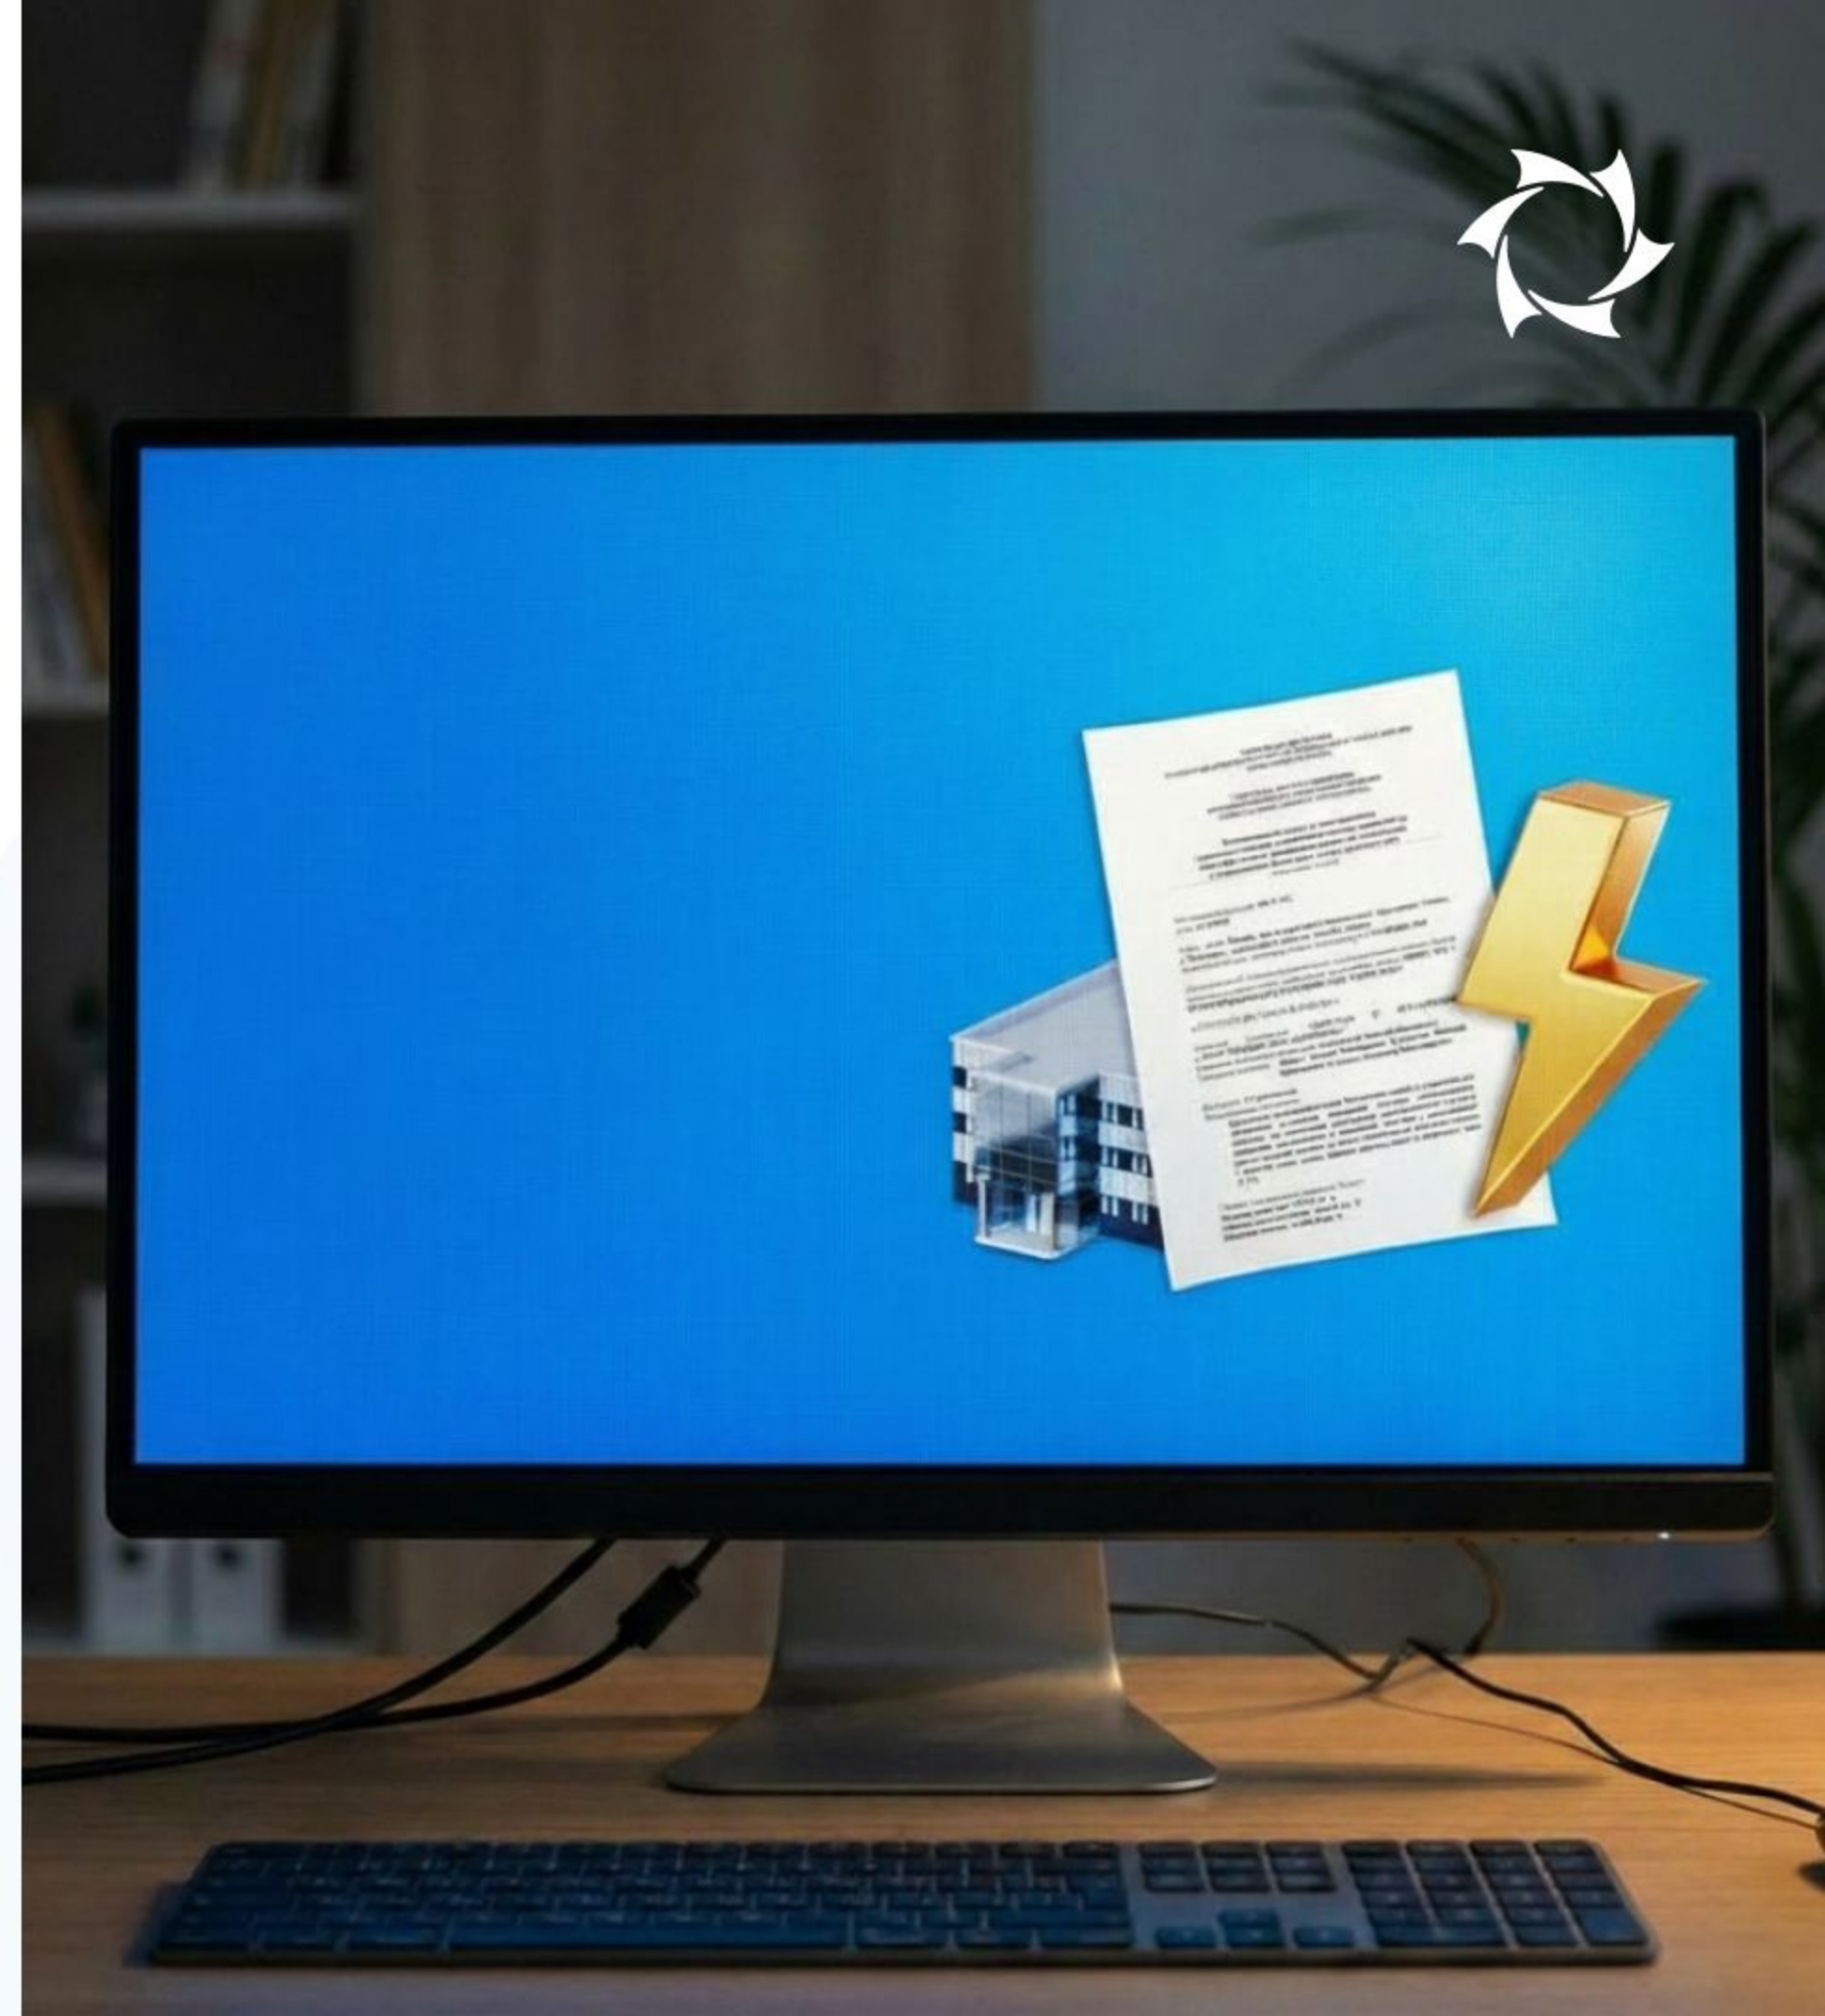

Commencement of comprehensive engine testing

August

"Sovelmash" received a certificate approving the architectural and urban planning solution from the Committee for architecture and urban planning of the city of Moscow

August

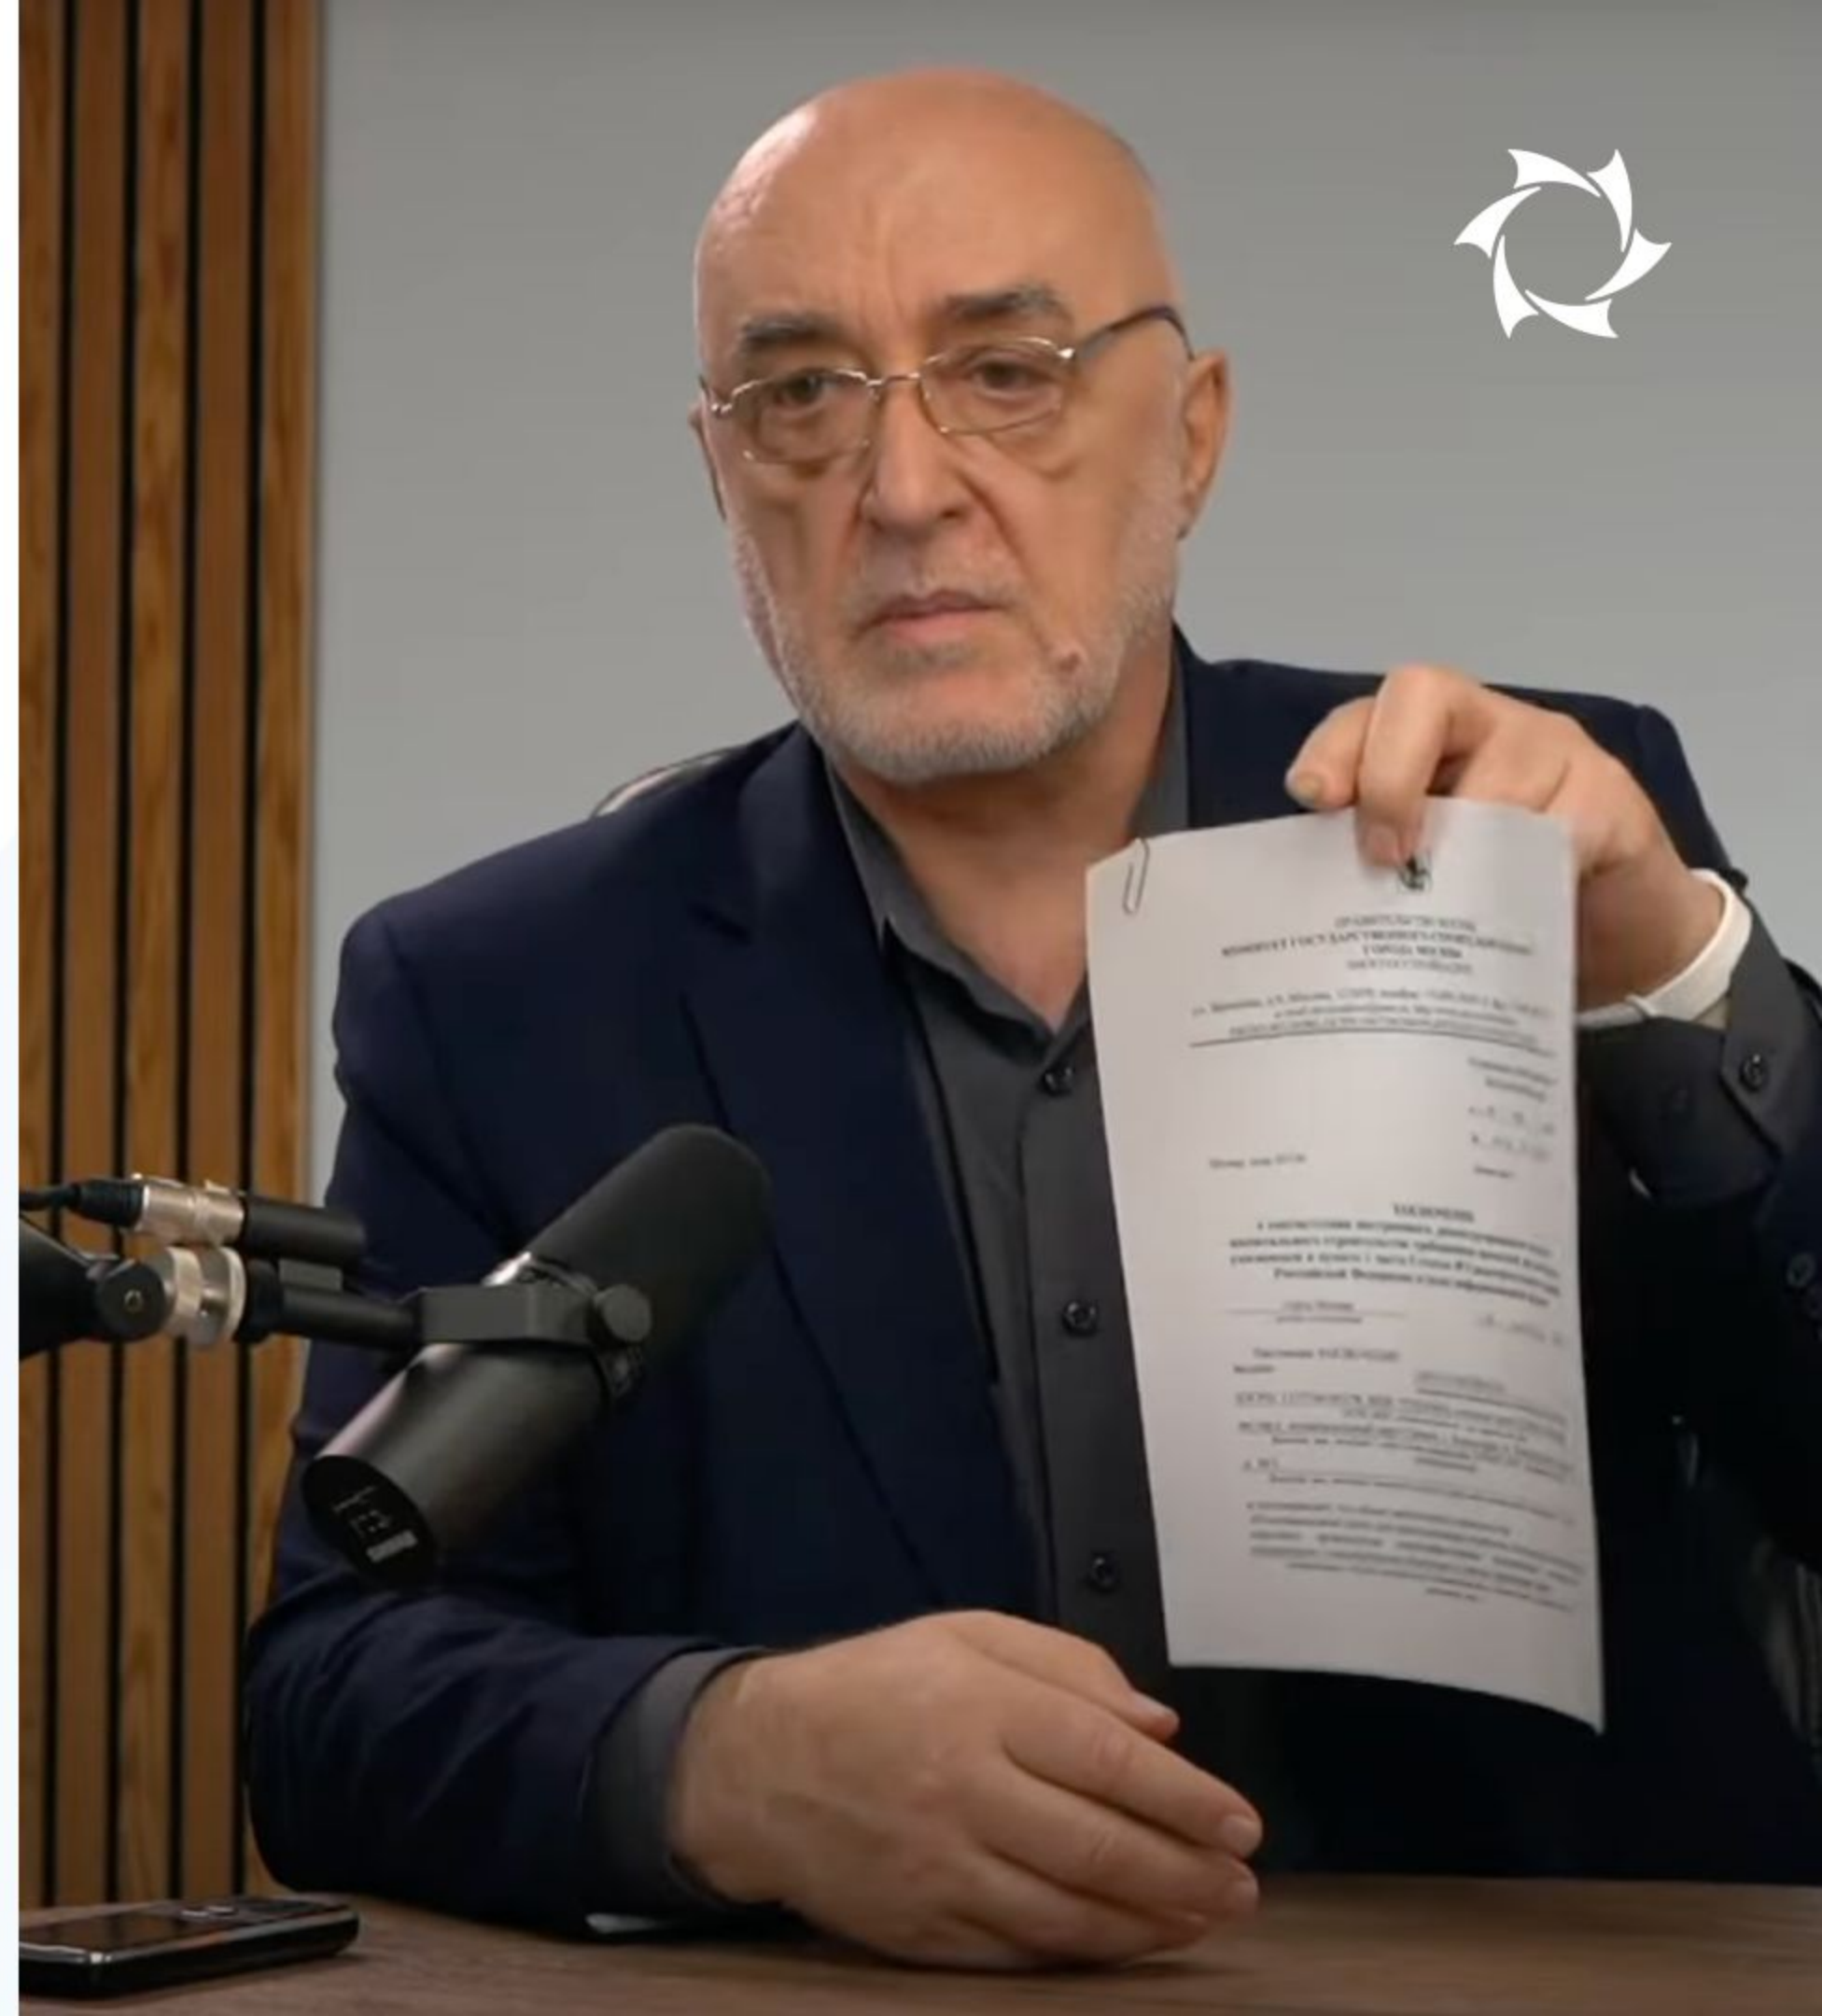

"Sovelmash" held a series of negotiations with potential clients, as a result of which it commenced drafting technical specifications

September

On September 17,
the company "Sovelmash"
received a construction
completion certificate

September

The following have been put into operation at the production facility:

- **a machine for cutting packaging inserts from foamed materials,**
- **stamping rotor segments for aircraft engines on a press**

October

New equipment has been delivered:

- shrink tunnel for heat-shrink packaging,
- lathes with CNC

October

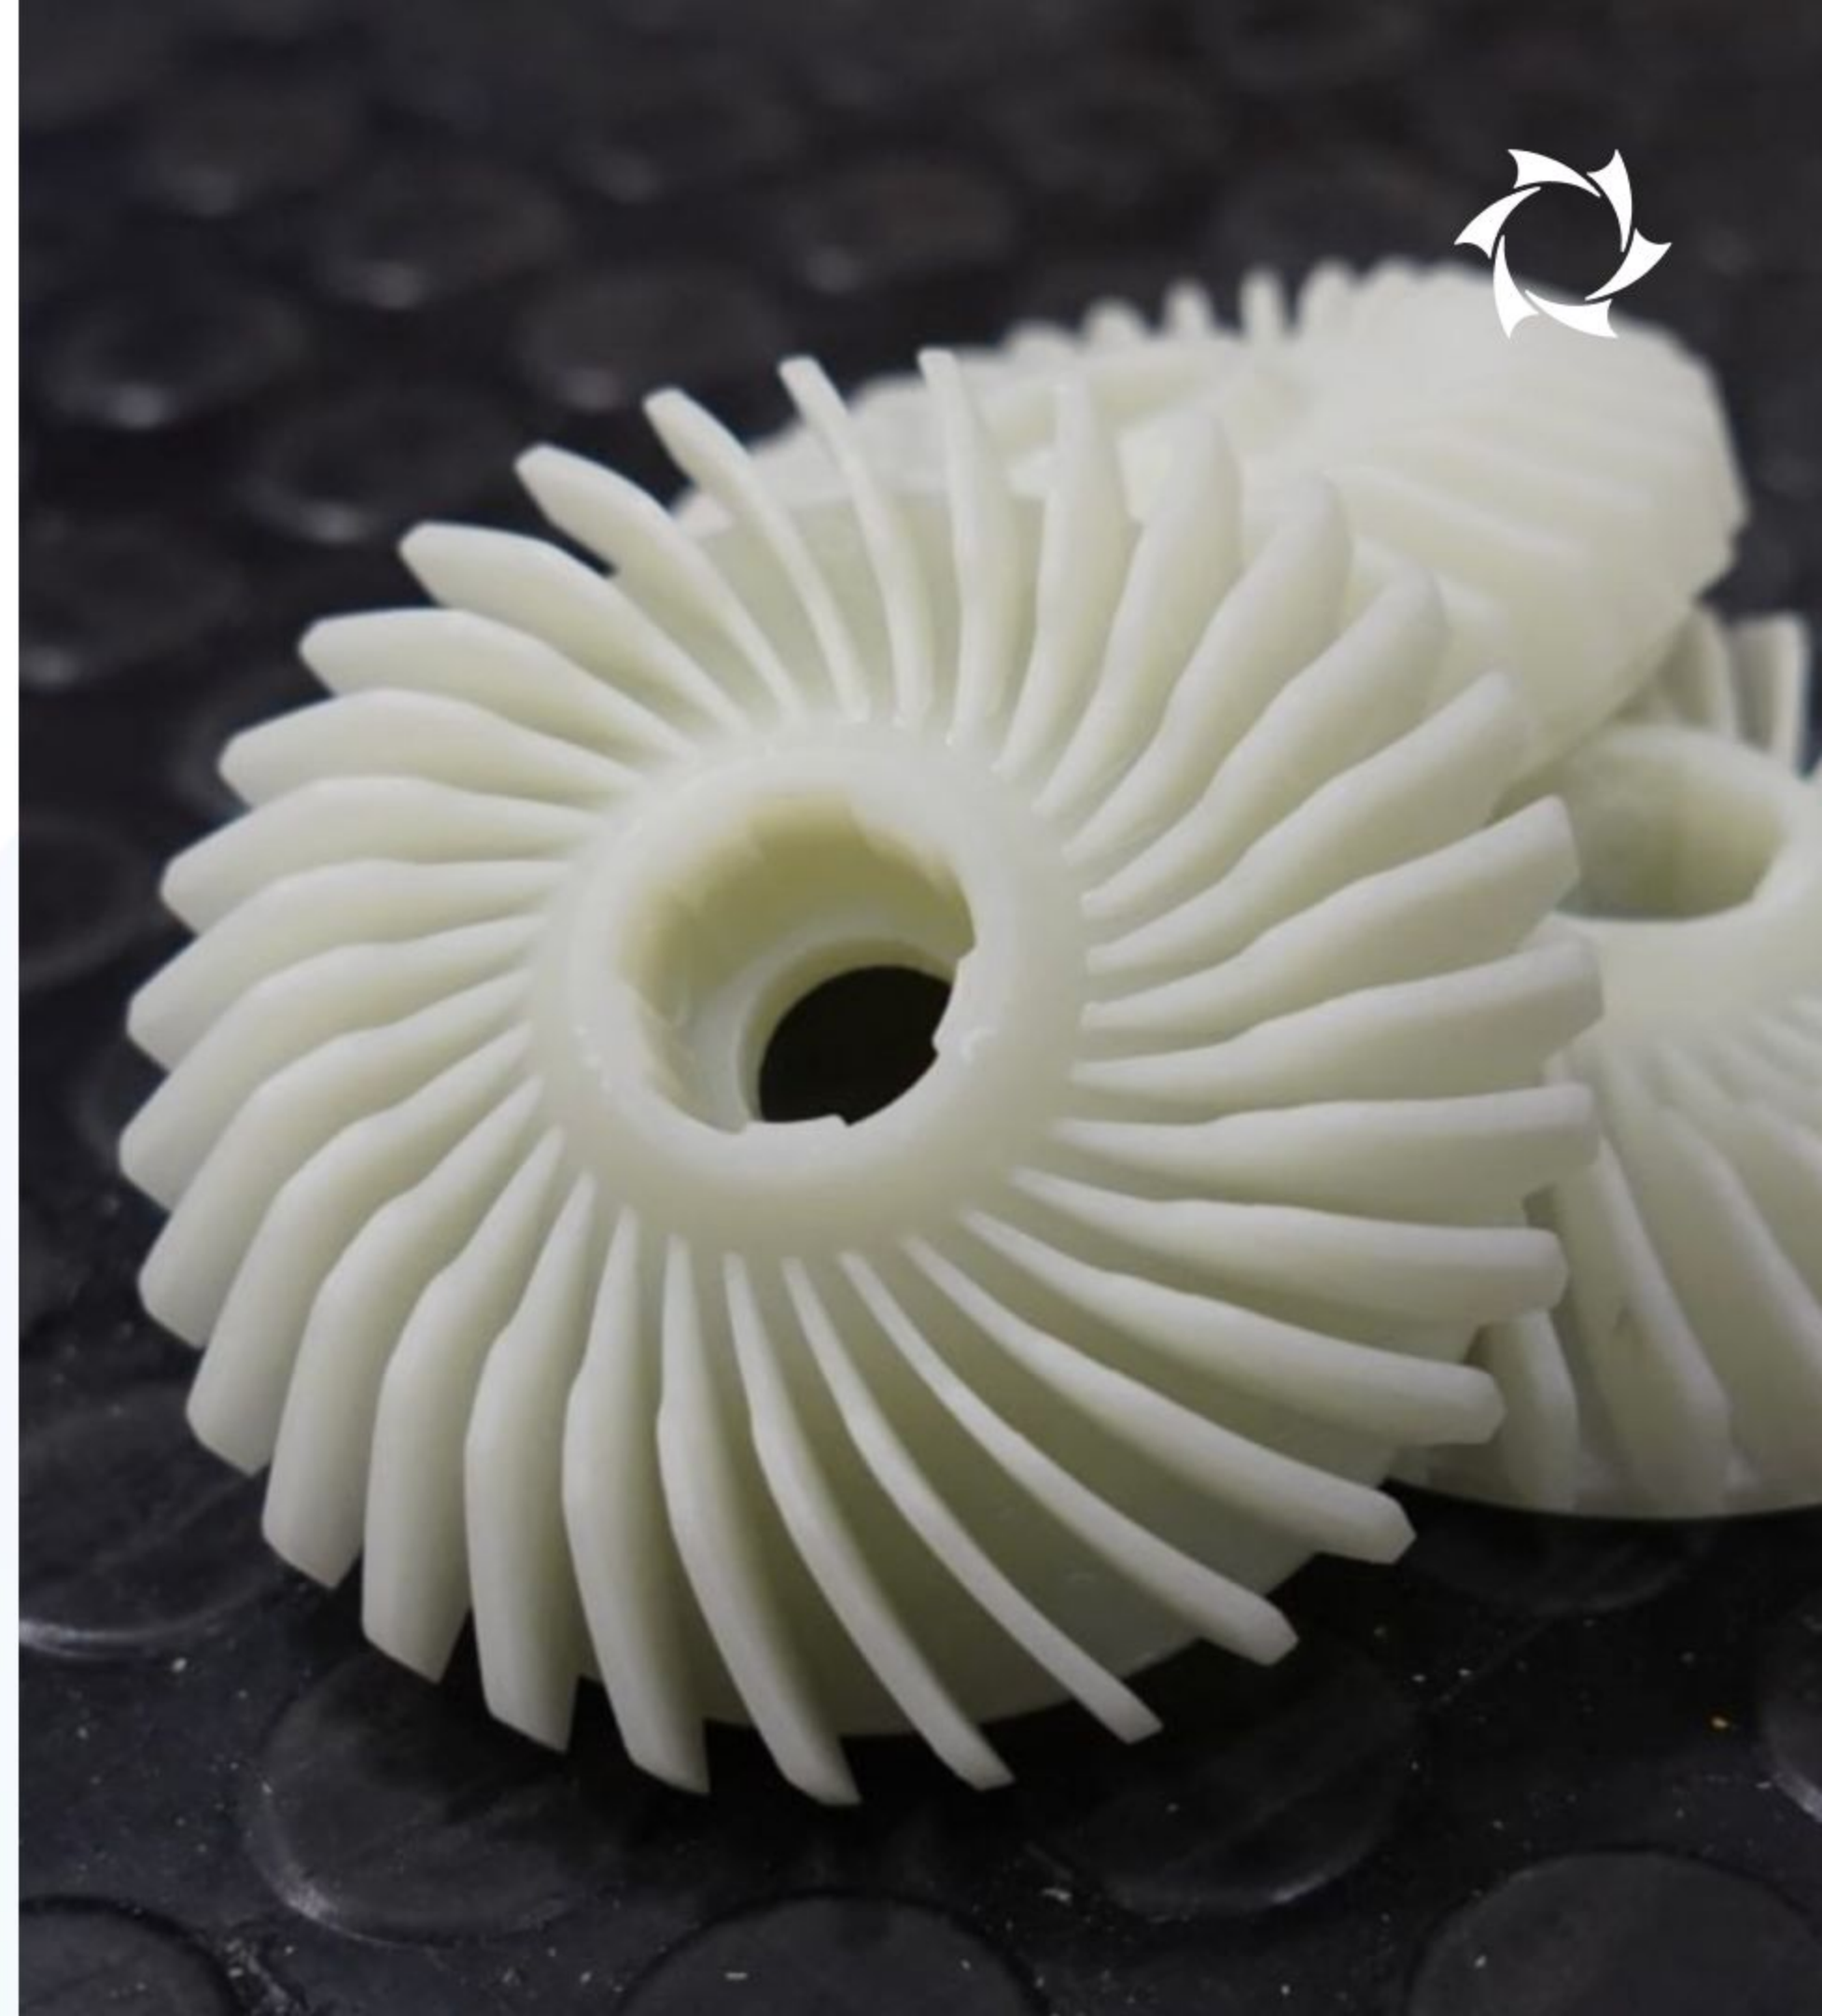

Delivered:

- **a unit for manufacturing foam packaging,**
- **a vibration test bench for testing products**

November

With the casting process for impeller bushings launched, components have been manufactured for the first commercial product — an angle grinder

November

An induction heating unit
using high-frequency
currents has been
commissioned

December

Guests of DETB "Sovelmash"

Visit of a SOLARGROUP
partner from Portugal

April

Guests of DETB "Sovelmash"

**Leading SOLARGROUP
partners from South Africa
visited the DETB**

July

Guests of DETB "Sovelmash"

Well-known blogger
Sergey Brekotin covered
"Sovelmash" on his blog
dedicated to energy,
economics, and geopolitics

November

Use of the "Slavyanka" technology worldwide

SOLARGROUP partners
from Ohrid have upgraded
a traditional boat by
installing a
Slavyanka-based electric
motor and solar panels

March

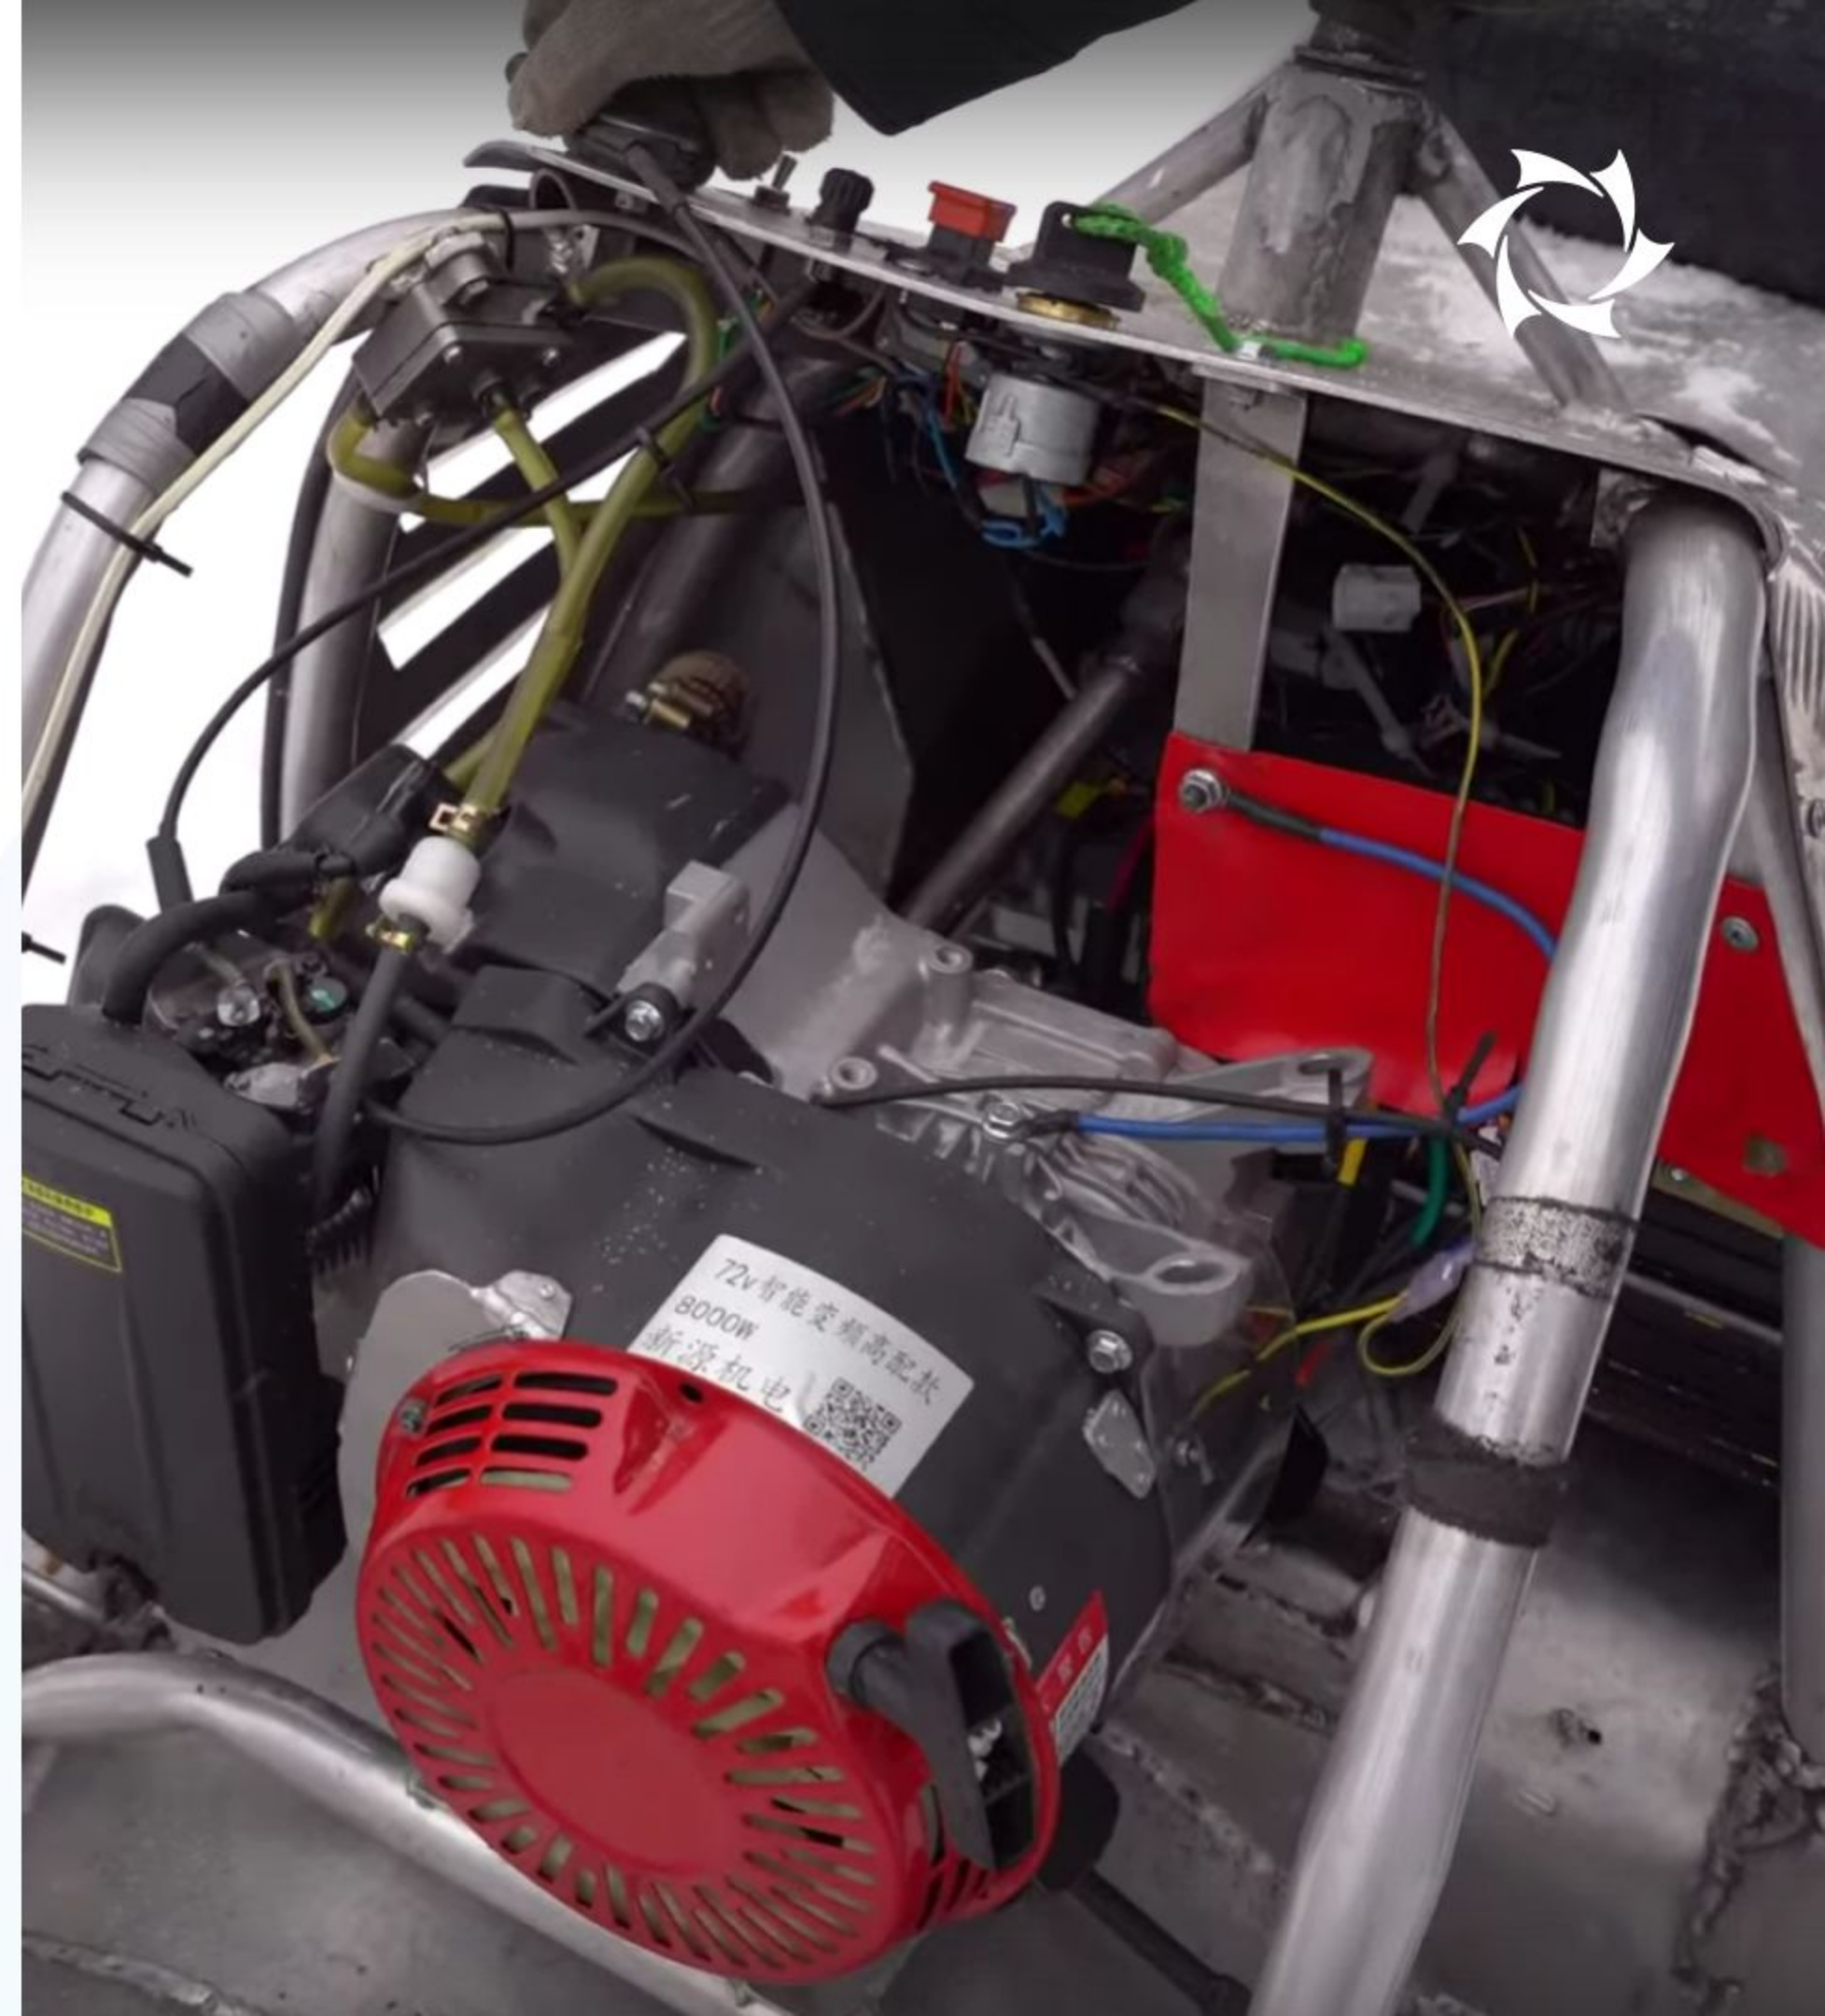

**Solar boat with
a Slavyanka-based motor
participated in the
International water
transport exhibition Nautika**

April

In Siberia, a snowmobile with a **Slavyanka-based motor** underwent testing

April

In **SOUTH AFRICA**, director of Production Cooperative "Resurs" Andrey Lobov presented the **"Slavyanka"** technology to participants in an international solar car race

July

**In Benin, the first tests of
an outboard motor using
Slavyanka took place**

July

News from the investment segment

Events

The first **SOLARGROUP** conference was held in Serbia

February

Events

A conference was held in Angola as part of the SOLARGROUP Africa Business Forum tour

June

Events

A conference took place in **Mozambique** as part of the **SOLARGROUP Africa Business Forum tour**

June

Events

In the RSA, 4 conferences were held as part of the SOLARGROUP Africa Business Forum tour

June

Events

In Nigeria, a conference was held as part of the SOLARGROUP Africa Business Forum tour

July

PROCHAINE PRÉSENTATION

LOMÉ

27.12.2025

Events

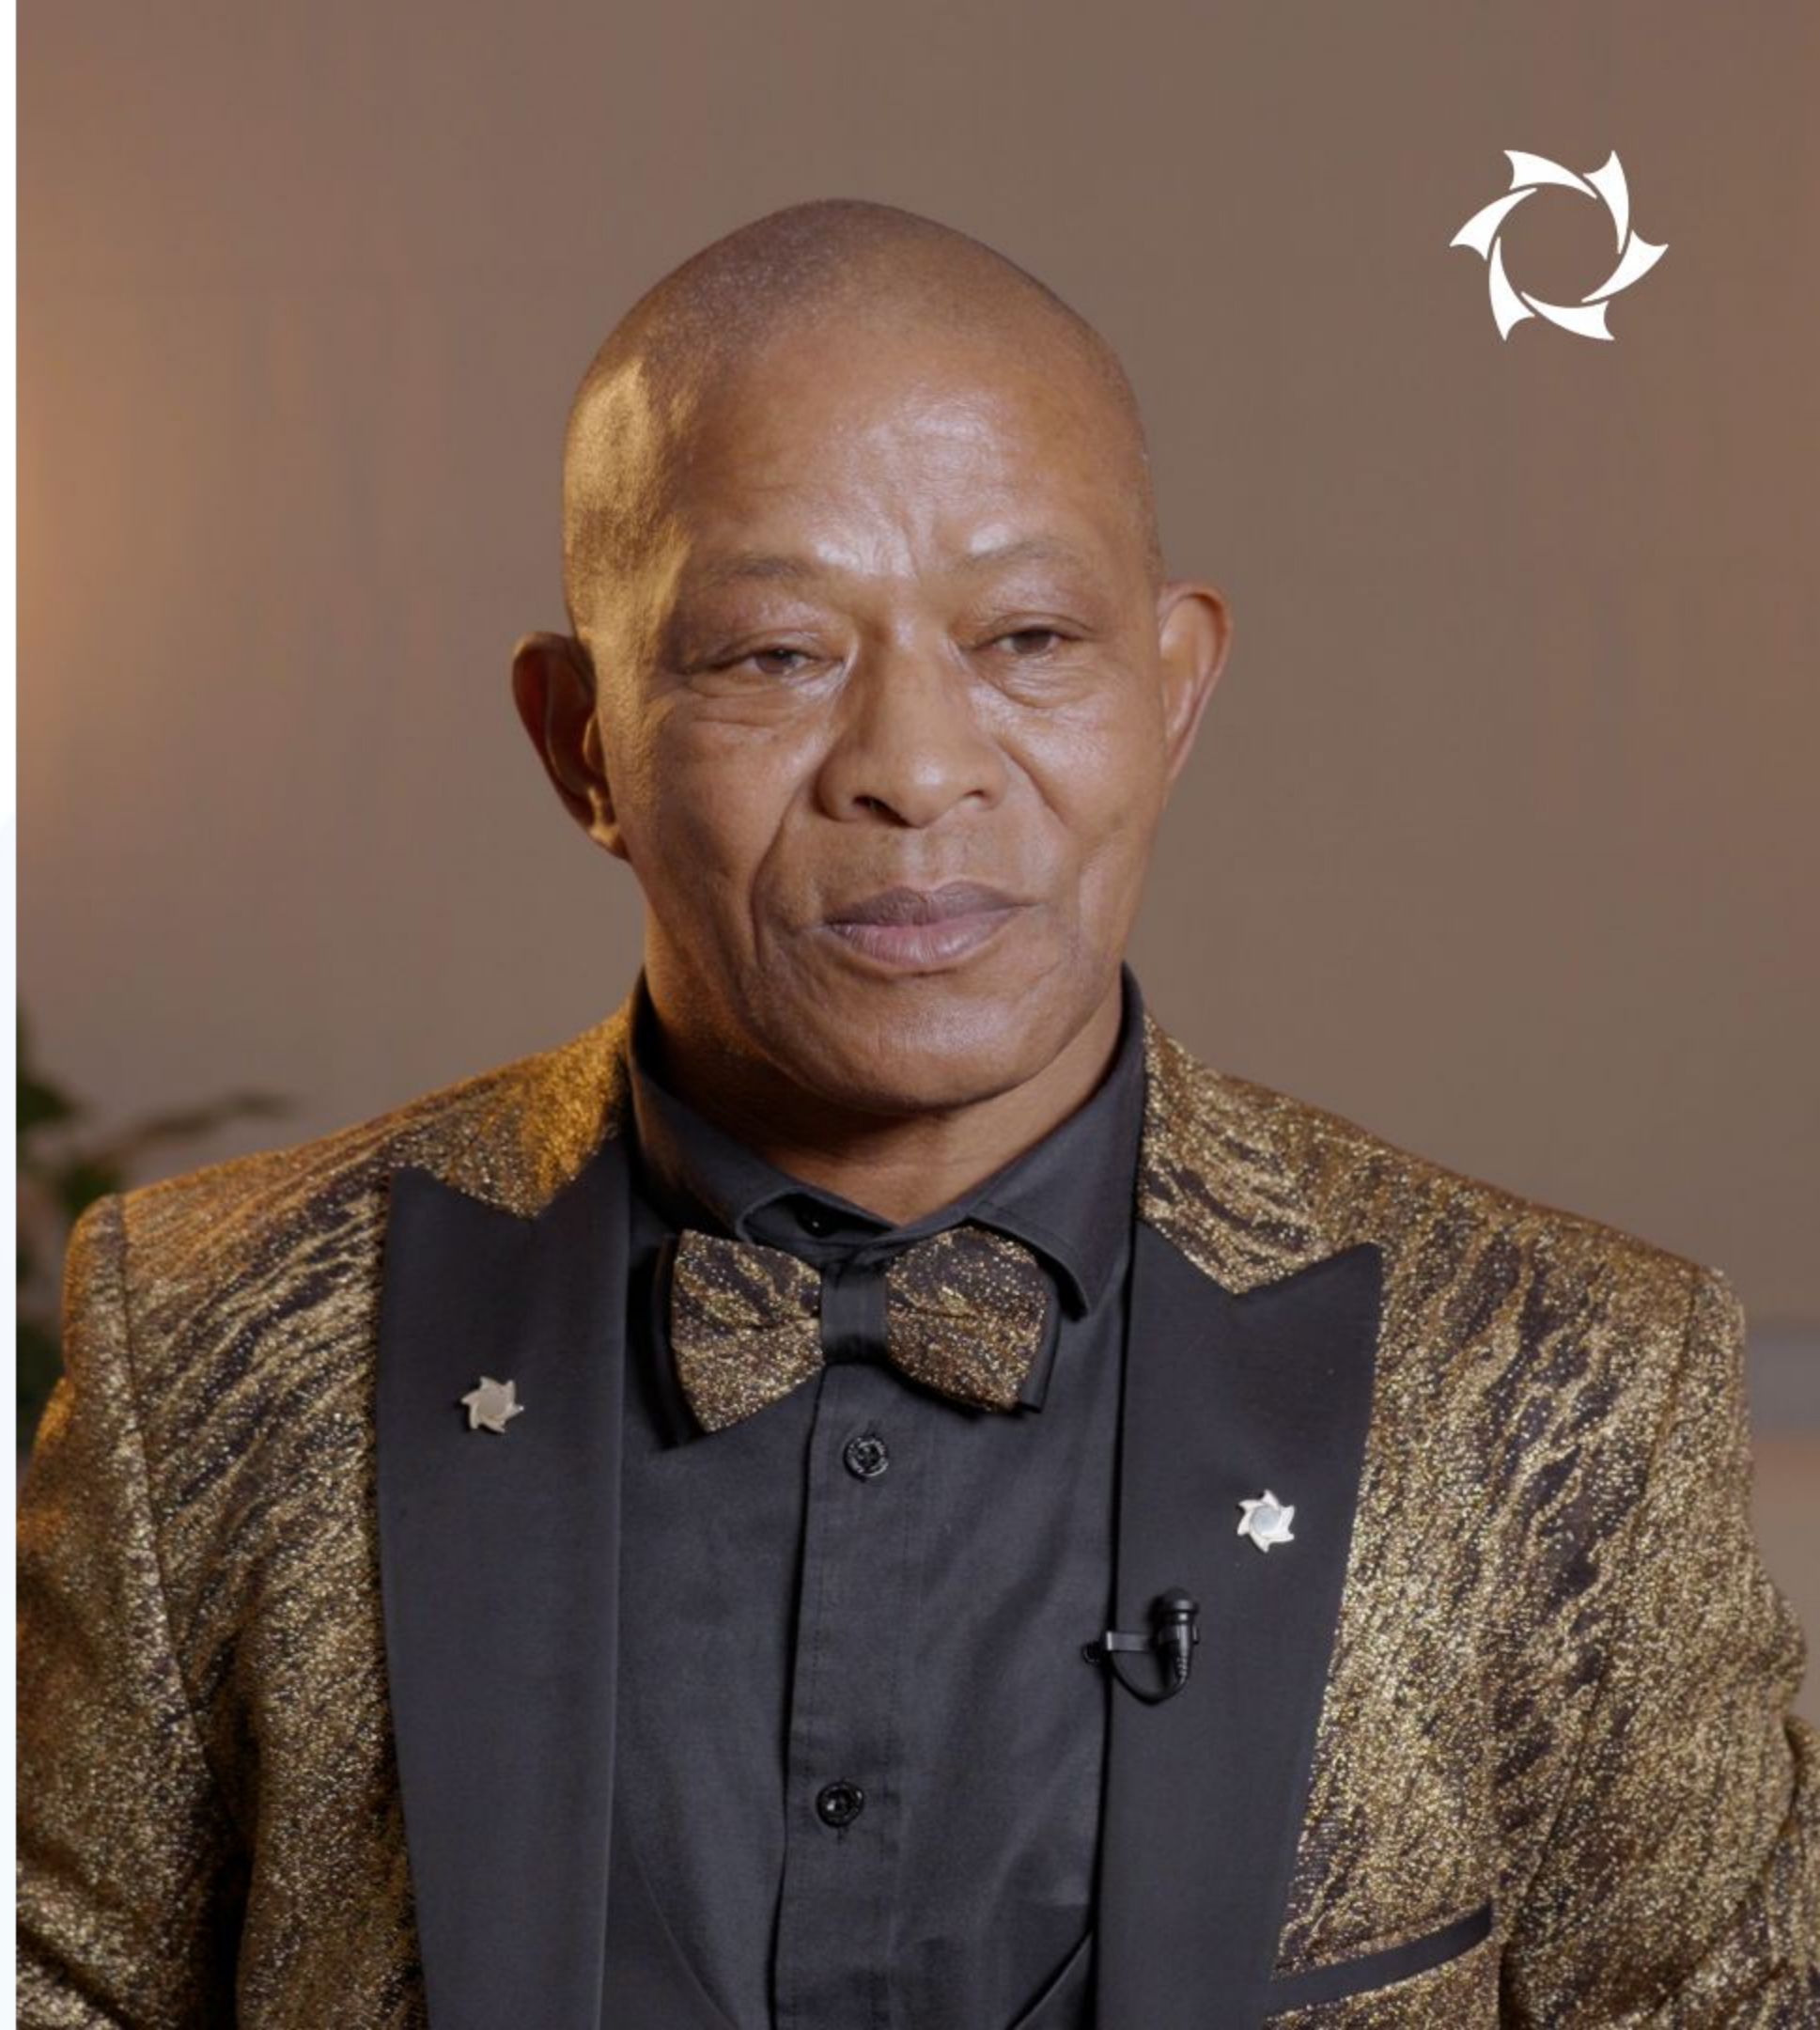

In Togo a SOLARGROUP conference was held

December

Events

SOLARGROUP has opened a representative office in **SOUTH AFRICA**. Sivuyile Thembinkosi Mtshemla has been appointed the representative for **SOLARGROUP** projects

January

Events

The grand prize has been awarded to the winners of the **SOLARGROUP** lottery — a Denzel Liberty motorcycle with an innovative motor featuring Slavyanka technology

August

Personal account SOLARGROUP

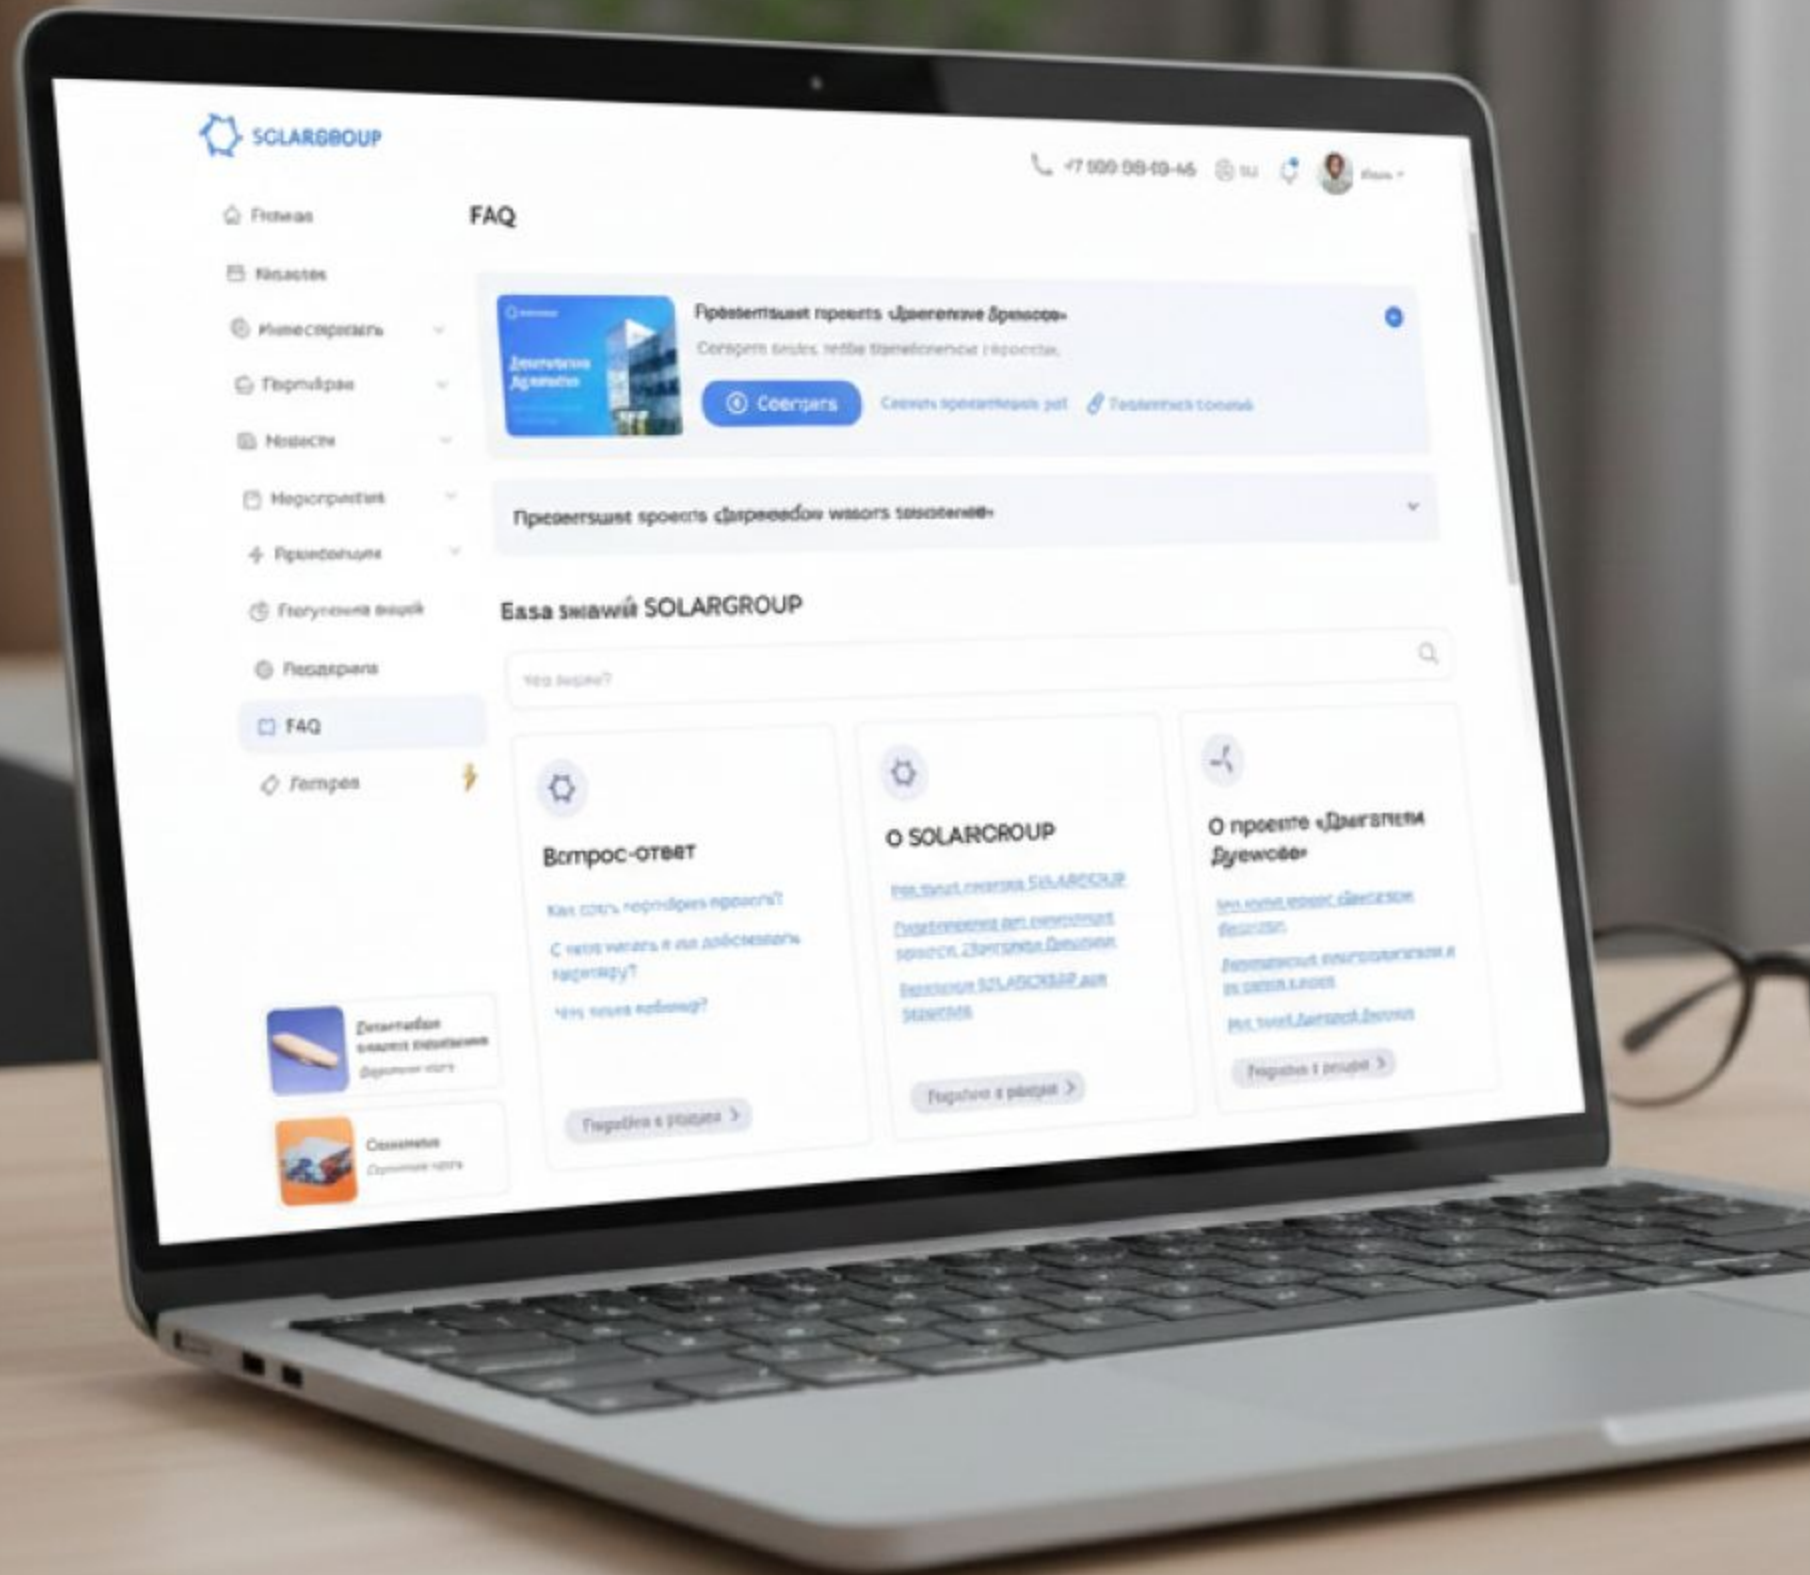

**Sign-in option has been
added to the personal
account via Telegram**

February

Personal account SOLARGROUP

For the convenience
of personal account users,
separate FAQ and Support
sections have been created

March

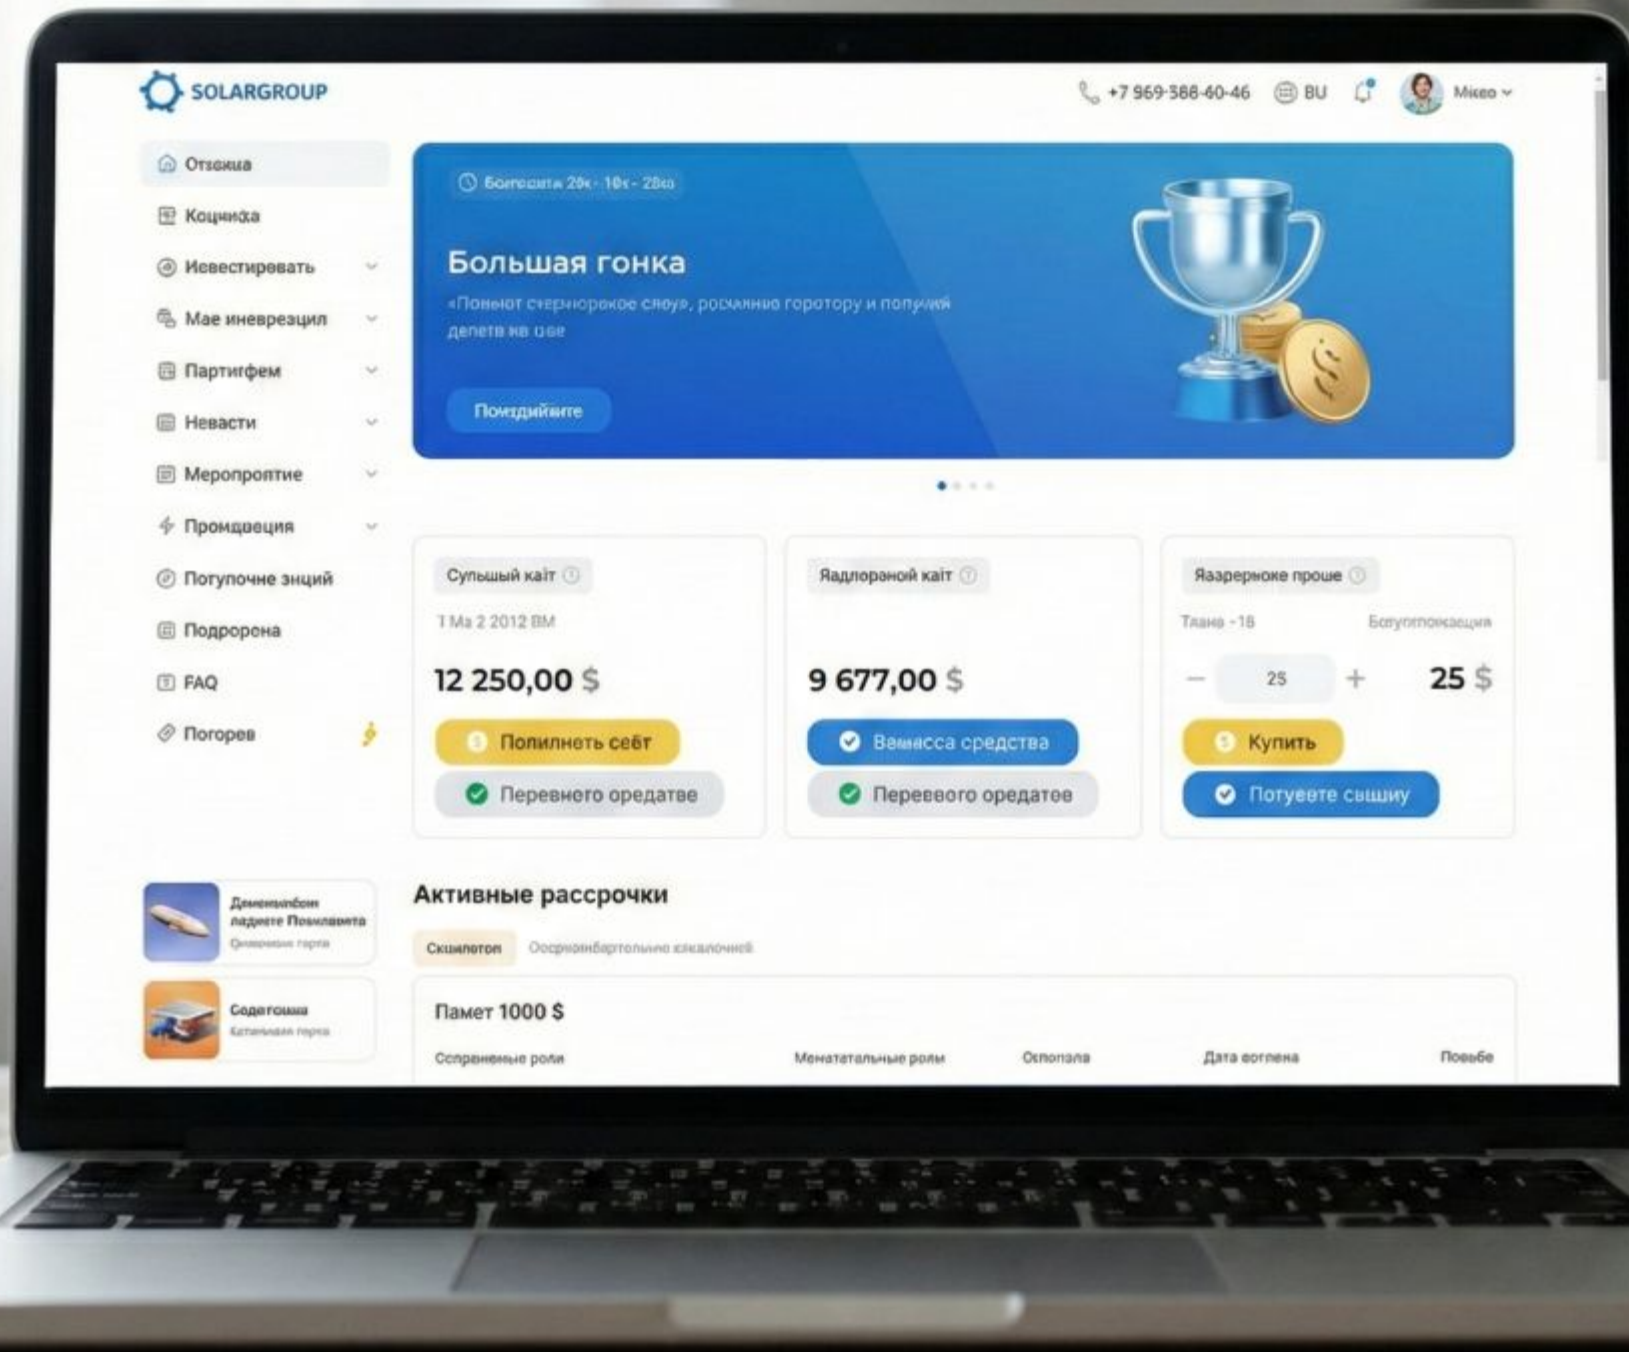

Personal account SOLARGROUP

Personal account is now
available in Serbian

April

Personal account SOLARGROUP

In the personal account,
the investor ranking and
shares by project have
been added

April

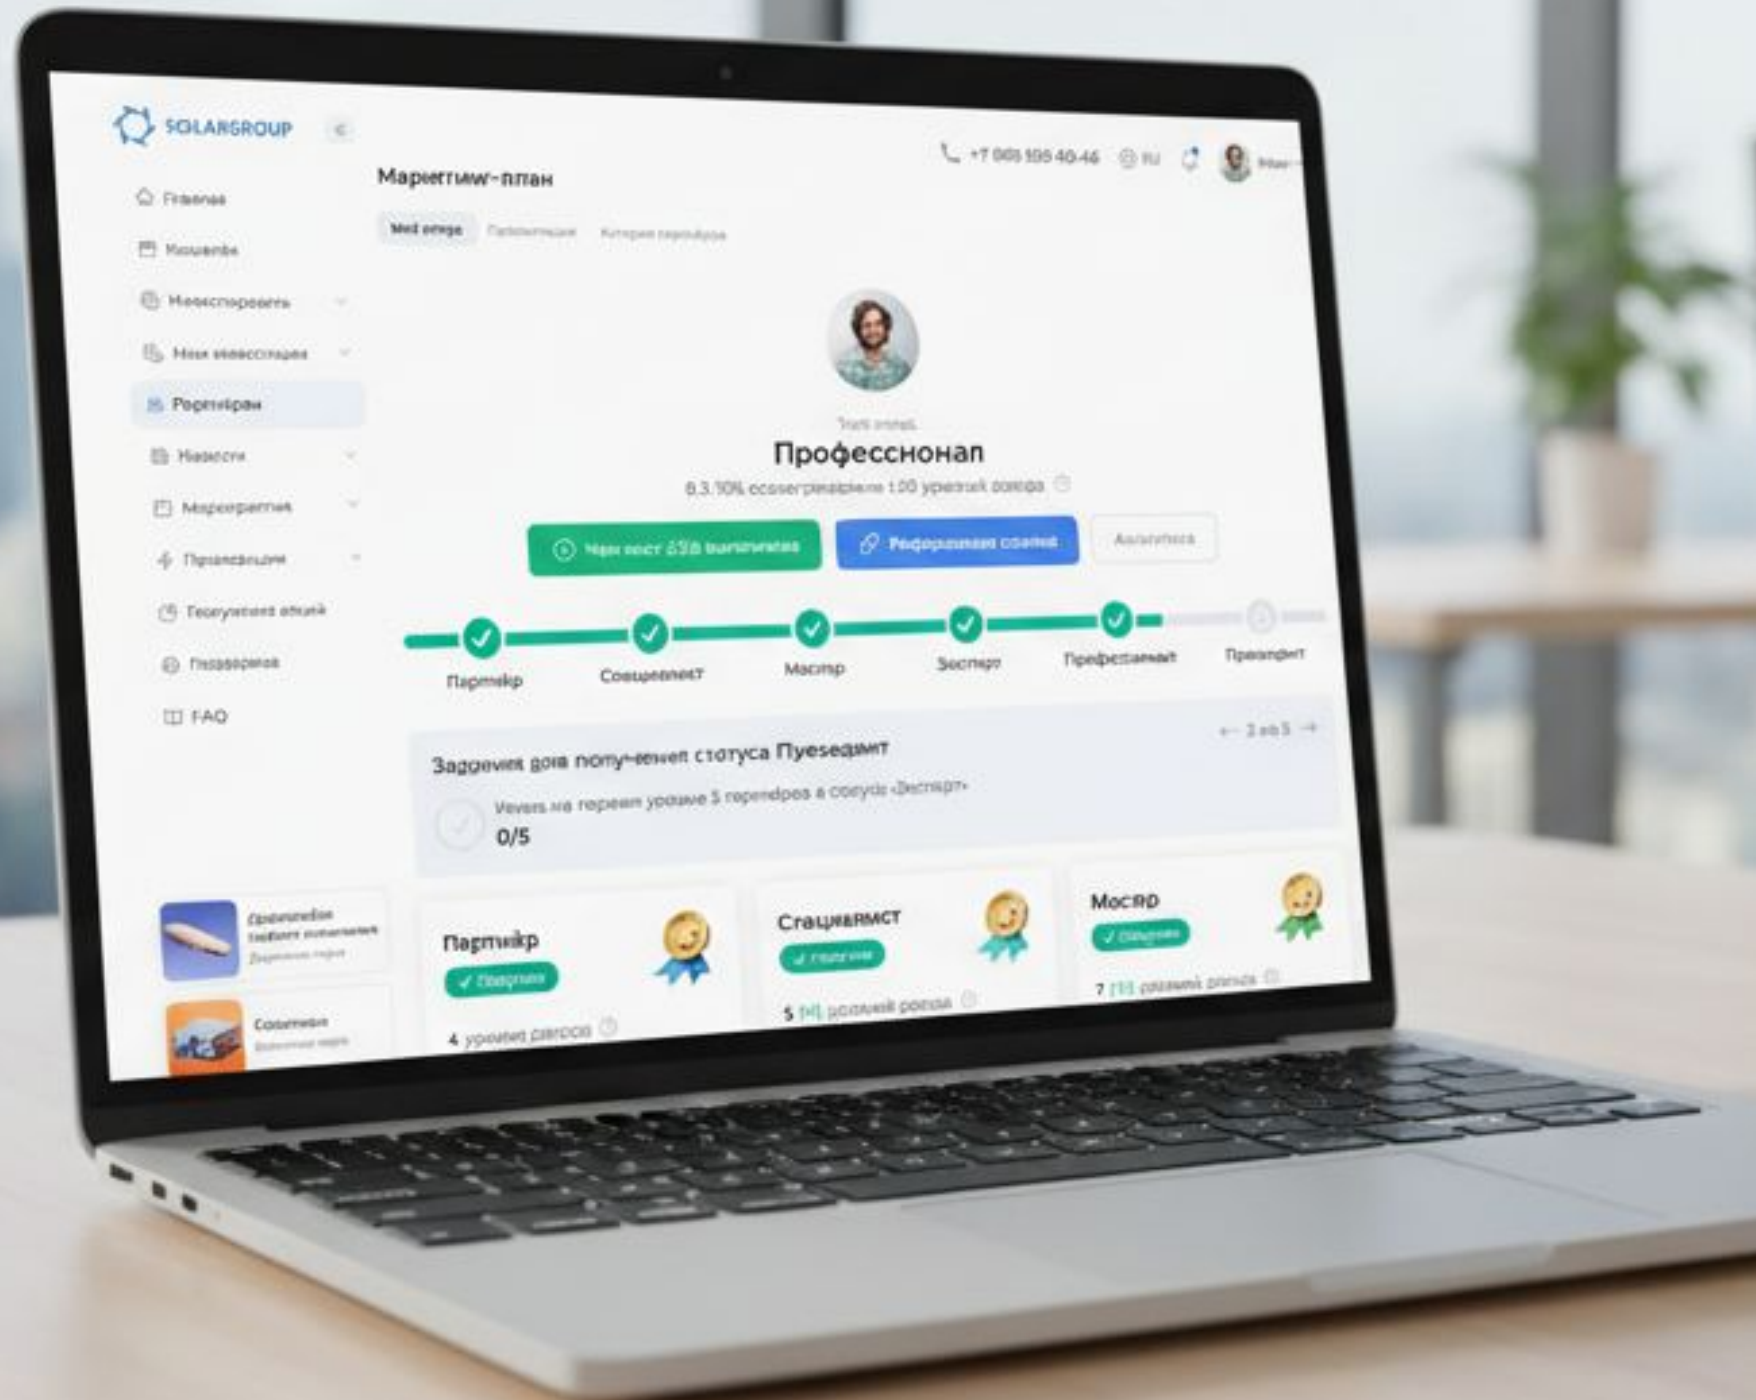

Personal account SOLARGROUP

**Added the ability to install
the personal account
as a PWA application**

July

Personal account SOLARGROUP

In the "Partners" section,
the "Marketing Plan"
subsection has been
completely updated
